

# IGOR SURZHKO

## Junior Full Stack Developer

☎ 053-80-22-893

🌐 surzhko.info

@ surzhko.igor@gmail.com

📍 Kiryat Bialik, Israel

## SUMMARY

I was working with code development first time in 2010 when I was studying at the institute and studying computer science. I wrote my first program in the Delphi language. Next time in 2018, I started to study javascript while helping with the organization of a cryptocurrency startup for my friend.

And now, I decided to immerse myself in the code study completely, and now I am looking for a company that is ready to take responsibility and invite me to work as a junior programmer.

**I am ready for any conditions. I consider all options. I will be glad even for a simple feedback.**

## SKILLS

### Front End

JavaScript   jQuery   Bootstrap

ReactJS   Redux   CSS3   HTML5

### Back End

NodeJS   PHP   MySQL   ExpressJS

### CMS

Wordpress

### Tools

Git   Gulp   Figma   Heroku

npm   VS Code   Rest APIs

TypeScript

## WHAT I'M PROUD OF

### My courage

To always leave my comfort zone. I'm not afraid to do whatever I need to do to achieve my goals!

### My Flexibility & Adaptability

I've left my city where I was born and raised in Ukraine 2 years ago, without knowledge of Hebrew to live in Israel, and I didn't have any problem with that. Then I decided to change my life radically and started to study programming at the age of 33, and I'm doing well.

### languages

Hebrew - Good  
English - Good  
Russian - Native
